Documentation Requirements for Students with Auditory (Hearing) Disabilities

Hearing loss can range from mild to profound. Each student’s hearing loss, background, courses of study, and language preferences will be considered when determining appropriate classroom accommodations. Students’ self-perceptions and communication strengths are often at variance with external measures of hearing loss.

Any hearing loss evaluation would be considered to be in the medical domain and require the expertise of a credentialed audiologist (CCC – Certificate of Clinical Competence). Information describing the certification, licensure, and/or the professional training of the individual conducting the evaluation must be provided.

Documentation should indicate the current impact of the disability. The age of acceptable documentation is dependent upon the stability of the hearing loss. The following guidelines are provided in the interest of assuring that the evaluation and report are appropriate for documenting eligibility and identifying reasonable accommodations. The documentation should include:

Name:________________________________________________________

1. A copy of the audiology report;

2. A brief description of the severity of the hearing loss;

3. A description of assistive devices/services currently prescribed or in use, including the possible effectiveness of these devices or services in an educational setting;

4. A description of the expected progression or stability of the hearing loss over time.
